The Renaissance of Nuclear Energy in the Shadow of Climate Change

Heather Conolley

Global Studies emphasis, Political Science PhD candidate, UCSB

Thursday, May 27, 2010 12:00 pm

Orfalea Center Seminar Room – 1005 Rob Gym

(office wing at Ocean Road in front of Rob Gym, left side)

Why do some countries choose to adopt civilian nuclear energy programs while others do not? In recent years, nuclear energy has experienced a “renaissance” of interest across the globe. The need for energy security, growing energy demand, and the need to combat climate change are most often cited as the primary drivers of the renaissance. This paper offers a statistical analysis to examine the determinants of nuclear energy policy.
